- Contribute to end to end data models and integration initiatives, market research, and CRM processes.
- Ensure data quality across dashboards and pipelines and assist with Agile project management.
- Analyze and present insights in Excel, SQL, Tableau, and Python to inform business decisions and support internal and external stakeholders.

JONES LANG LASALLE, Boston, MA **2024**

One of the world's largest global real estate and investment management companies offering leasing, property management, and investment management services.

Knowledge Management Intern

- Reduced sales team's weekly data entry time from hours to minutes by automating team project reporting in Salesforce, Financial Force, and SmartSheet using Power Query in Excel.
- Improved access to current information by researching needs with team members and managers, then redesigning, organizing, and implementing new SharePoint organizational structure.
- Eliminated errors by updating and consolidating existing reference guides and creating new reference guides.

BOSTON BEER COMPANY, Boston, MA **2023**

Leading craft brewer in the United States, known for brands like Samuel Adams and Truly Hard Seltzer.

IT Data Analyst Intern

- Removed obsolete data by serving as sole intern responsible for maintaining databases across the organization.
- Reduced bottlenecks by interacting with sales representatives to process requests for updating accounts.
- Optimized data integrity and accessibility by implementing new database entry standards.

XOMETRY, Virtual **2022**

Xometry matches manufacturers with potential customers and allows buyers to access global manufacturing capacity.

Technology Intern

- Reduced product request time and made tracking products easier by developing an interface to streamline the onboarding and shipping processes for 3D manufactured products.
- Eliminated over five hundred errors per month while enhancing user satisfaction and efficiency by automating common processes.
- Streamlined accuracy and timeliness of estimated shipping cost by using Apps Script to automate calculations.
